LITTELL'S LIVING AGE,

By LITTELL & Co., Proprietors of The Museum and Recorder, 31 Winter street, Boston.

This work is regarded in the opinion of Littell's Museum of Foreign Literature, (which was favorably received by the public for twenty years,) but as it is twice as large, and appears in a form that will preserve it from year to year, it is destined to be much more extensively useful. Not only does it present a full freshness to all by many things which were excluded by a month's delay, but while it has a standing interest peculiarly its own, it has a greater and more attractive variety, is able so to increase the solid and substantial part of his literary, historical, and political treasures, as to satisfy the wants of the American reader.

The Eclectic and Select Reviews of the Edinburgh, Quarterly and other Reviews, and Blackwood's Magazine, with the criticisms on Poetry, Science and Art, and the contributions to Literature, History and General Life, by the ingenious Spectator, the sparkling Examiner, the judicious Athenæum, the learned and industrious Literary Gazette, the scientific Leader and conscientious Britannia, the solid and respectable Christian Observer, form an entire body of the best Literature of the English language, for this by its immense extent and comprehensiveness includes a considerable portion of the foreign mind in its natural expression of the present age.

The Daily News.

NEW-YORK:

BY CRANSTON & NORMAN,

125 Thames Street.

FRIDAY MORNING, JUNE 14, 1839.

From statistical returns made to the French Parliament, it appears that not less than 10,000 persons annually lose their lives in Great Britain, by accidents of one description or another. We know of no certain means of ascertaining how many are accidental deaths in this country, every year; but the number cannot be less here than in Great Britain. Such a terrible mortality, chiefly from carelessness, appeals to humane heart. The enquiry naturally arises:—in what way can the evil be lessened? In England, after examining every plans, it was finally resolved to make the owners of railroads, steam boats, mines, and other causes of the disasters, responsible for the support of the widows or orphans of the victims; and this on the ground that, as the accident occurred from the carelessness of the company's agents, the company should make compensation to the sufferer's family. The scheme has been found to work well. Great vigilance is now exercised, and the loss of life, in consequence, has decreased. Might not some plan be followed in this country, with beneficial results. Not one steamboat in a hundred explodes, but through the fault of some of her officers, or a defect in the boilers. Rarely is a man killed on a railroad without carelessness resting on the head, because we the engineer, or the conductor. The true way to enforce greater watchfulness is to attack the pocket. It is true a remedy lies by the old common law, but, in this case, the plaintiff is forced to prove neglect, where a the neglect ought to be presumed, and the defendants compelled to rebut. If Congress would pass a law to this effect, we believe the loss of life, by accidents would decrease one half.

A Steam Boiler Explosion at Cincinnati on Saturday, destroyed the works of Messrs. Johnson and Morton, two persons were seriously injured, and one man was blown through the roof, with but little damage.—The loss is estimated at $9000.

Another Crevasse has occurred in the right bank of the Mississippi river, about twenty miles above New Orleans, on the upper plantation of William Payne. It is said to be increasing rapidly.

Naval.—The U. S. frigate Congress, Capt. Melville, bearing the broad pennant of Commodore Mc Keever, bound to the Pacific station, went to sea from Hampton Roads Saturday morning.

Commander Stribling is to take command of the U. S. Naval School at Annapolis, in place of Commander Upshur, and Lieut. Thomas to be ordered as Lieutenant, in place of Lieut. S. B. ——, whose term of service has expired.

It is rumored that Lieut. C. B. Boutwell, who is entitled to promotion as Commander in consequence of the death of Comm. Cooper, is to be ordered to the Brooklyn Navy Yard.—*Norfolk Herald, June 10.*

The Boston Traveller states that the retail traders of that city are cheated out of $50,000 annually, by means of counterfeit money. Three rogues are now under arrest on charges of altering various bank bills.

The Great Tunnel on the Baltimore and Ohio Railroad, is one of the greatest works of civil engineering now going on in the world. It is a few miles from Morgantown, West Virginia, and is through a mountain a mile and a quarter wide.

☞ We learn from the New York Tribune, that an appropriate and altogether original plan has been devised for the erection of a monument at Mount Auburn to the memory of the late Mrs. Osgood.

Jersey Lead Works.—Work is begun on the new "Jersey Lead Works," that is to be located on the Lefferts property in the rear of Broadway, opposite Bond street, New York. The building will front on Mercer street. It will be 100 feet deep and 150 feet wide, and is to be arranged for a steam-engine of 15,000 power. Mr. Gilmore is to be the architect. The entire cost of the structure is estimated at $85,000. It will be ready for the "Nightingale" in September next.

"Did you say, James, that your wife had *fits*?" "Yes, she has them quite often." "Well, I wish my wife were similarly afflicted. She has tried a dozen dress makers within last twelve month, and not a fit to suit her has she got yet."

A young thief who was charged the other day with picking pockets, pleaded, in the mitigation, "for first, that he never had picked pockets, but only always taken them just as they came."—*Punch*

LATER FROM CUBA.

Boston, June 12th. The U. S. steamer Spencer arrived at Norfolk on Tuesday last, having left Havana on the 6th inst. Capt. Tatnall, her commander, arrived at this city in the Norfolk steamer this morning, and proceeded immediately to Washington. He received despatches from the Spanish authorities that the prisoners captured should be honorably dealt with, and advices should be received from the Cuban government.

The report that the Spanish fleet had been placed under the authority of Cuba, to assist in capturing vessels with the negroes on board, was incorrect. The prisoners of the late Cuban expedition had been treated with great humanity. All the island was quiet when the Saranac left. The shooting of five prisoners, heretofore reported, is incorrect. The prisoners are at Havana, and will be sent home. The Spanish authorities expressed much satisfaction at the course of the American Government.

The Captain of the Saranac called on the Captain General of Cuba, and stated the reasons why the men captured at Cooley had abandoned the expedition and inquired what course the Spanish authorities intended to pursue in relation to those captured at Cooley and Cardenas. In reply he was told that destruction had been made between those taken at Cooley and those who landed at Cardenas. The former were well treated, and would have a fair opportunity to prove their innocence, though no one was permitted to visit them. Altogether the interview was considered satisfactory. Three hours after the Saranac anchored at Havana, a Spanish man-of-war came in with prisoners, but no prize: the latter, it was supposed, having been ordered to some other port to avoid a collision.

Burgis Potter, }
Philadelphia, June 8th, 1839. }

Dear Sir:—

I write this enclosing a letter I received from my friend Dr. Green, of Worcester, relative to Prince's invention, as it respects the important discovery of Gas light; being anxious to know the whole truth from a resident of that city, or town, what was the true account of it.

If it should be your opinion to publish it in your paper, you are freely welcome so to do. I have conversed with Dr. Hare, of this city, and he says if it is true, a great fortune attends the mortal who has discovered or brought to *light* one of the most valuable inventions of the present day.

We are all well and after spending two or three months in this *Dutch* city of the east, on Thursday next and be made most happy in meeting the smiles of my intimates, hoping not to see a frown upon the countenance of any man, woman, or child in a place where contentment reigns and peace and happiness doth dwell.

Yours, truly and faithfully,
RICHARD C. DERBY.

Worcester, May 26th, 1839.

R. C. Derby, Esq.,

Dear Sir,—

Last evening was the first time I was able to find Mr. Prince at his house with his gas light in operation, he exhibited one of the most brilliant sights I ever witnessed, the different shades of colour could be change, and as clearly as in broad daylight, whether it was more susceptible of light or from its intensity I had not time to ascertain. The gas was burned in the gas fixtures common in Philadelphia, and indeed they were manufactured in that city and sent to this market for sale.

From Mr. Prince I obtained the following statements.

1st. The article burned was Hydrogen carbonized by passing through turpentine.

2. With 1 1-2 feet of gas he produces a light equal to four argand lamps for one hour.

3d. The Hydrogen was formed by decomposing water by Magnetic Electricity.

4th. The gas can be furnished for 5 cents for two cubic feet.

5th. With a small machine not occupying more than 1 or 5 cubic feet he can furnish 300 feet of gas in an hour.

6th. By a few minutes labour with the small machinery which he now has in operation, he lights, burns, and does all the cooking for his family in 24 hours, that is he fills his gas meter full enough for that purpose.

Mr. Prince says he has discovered the Electro Magnetic fluid is perishable, he has availed himself of the fact and by a proper application of Machinery is able to decompose water with such rapidity that he can procure a large quantity of Hydrogen at a very trifling expense. A machine that will cost $100 will produce 2700 cubic feet of gas in an hour, with less than 5 cents cost, the machine will last for years with very little or no expense for repairs.

I understand the Post Office of this city is to be lighted with his gas, in the course of this week, if so, and the machinery is under the charge of another person, we shall soon know how far we can depend upon it.

The correspondence which I have every reason to believe is true and has been the production of a gentleman of long standing in New York, I consider a proof to the demonstration that the gas is formed under any pressure.

Yours respectfully,
[illegible]

LAWS OF THE UNITED STATES.

BY AUTHORITY.

PUBLIC ACT

Providing for the Seventh and Subsequent Censuses of the United States.

(Public—No. 5.)

AN ACT providing for the taking of the Seventh and subsequent Censuses of the United States, and to fix the number of the members of the House of Representatives, and provide for their future apportionment among the several States.

I.—OF THE DUTIES, LIABILITIES, AND COMPENSATION OF MARSHALS.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the marshals of the several districts of the United States, including the District of Columbia and the Territories, are hereby required respectively to cause all the inhabitants to be enumerated, and to collect all the other statistical information within their respective districts, in the manner provided for in this act, and specified in the instructions which shall be given by the Secretary of the Interior, and in the tables annexed, and to return the same to the said Secretary on or before the first day of November next ensuing, omitting from the enumeration of the inhabitants Indians not taxed; also, at the discretion of said Secretary, any parts of the statistics of the Territories except those of population; *Provided, however*, And if the time assigned for making the returns shall prove inadequate for the Territories, the said Secretary may extend the same; *Provided, further*, If there be any district or Territory of the United States in which there is no marshal of the United States, the President shall appoint some suitable person to discharge the duties assigned by this act to marshals.

Sec. 2. *And be it further enacted*, That each of said marshals shall, before entering upon his duties, take and subscribe the following oath or affirmation; before any circuit or district judge of the United States, or before any judge of any State court, to wit:

I, , marshal of the district of , do solemnly swear (or affirm) that I will to the best of my ability enumerate or cause to be enumerated, all the inhabitants of said district, and will collect, or cause to be collected, the other statistical information within the same, and will faithfully perform all the duties enjoined on me by the act providing for the taking of the seventh census. And when duly authenticated by the said judge, he shall depositе a copy thereof, so authenticated, with the marshal shall discharge any of the duties herein required, until he has taken and subscribed this oath, and forwarded a copy as aforesaid.

Sec. 3. *And be it further enacted*, That each marshal shall separate his district into subdivisions containing not exceeding twenty thousand persons in each, unless the limitation to that number causes inconvenient boundaries, in which case the number may be larger, and shall also estimate, from the best sources of information which he is able to obtain, the number of square miles in each subdivision, and transmit the same to the Department of the Interior: *Provided, however*, That in bounding such subdivisions, the limits thereof shall be known, civil divisions, such as county, parish, township, town, ward, or district lines, or highways, or natural boundaries, such as rivers, lakes, &c.

Sec. 4. *And be it further enacted*, That each marshal shall appoint an assistant for each subdivision who is resident therein, to whom he shall give a commission under his hand, authorizing him to perform the duties herein assigned to assistants, which commission shall set forth the boundaries of the subdivision, of which appointment notice shall be given, and the four days so specified, the marshal shall keep a true and faithful record.

Sec. 5. *And be it further enacted* that each marshal shall seasonably supply each assistant with the instructions issued by the Department of the Interior, the blanks provided for the enumeration of the population and the collection of other statistics; and give to him from time to time all such information and directions as may be necessary to enable him to discharge his duty. He shall carefully examine whether the returns of each assistant marshal be made in conformity with the terms of this act, and where discrepancies are detected, require the same to be corrected. He shall dispose of the two sets of the returns required from the assistant marshals as hereinafter provided for, as follows: one set he shall transmit forthwith to the Secretary of the Interior; and the other copy thereof he shall transmit to the office of the Secretary of the State or Territory to which his district belongs. He shall classify and determine the rate of compensation to be paid to each assistant marshal according to the provisions of this act, subject to the final approval of the Secretary of the Interior. He shall continue to time make himself acquainted with the progress made by each assistant marshal in the discharge of his duties, and in case of inability or neglect arising from sickness, or otherwise, appoint a substitute.

Sec. 6. *And be it further enacted*, That if any marshal shall, by any arrangement or understanding whatever, agree to himself any fee, reward, or consideration for the appointment of any assistant, or shall in any way receive to himself any part of the compensation provided by this act for the services of assistants, or if he shall knowingly neglect or refuse to perform the duties hereby assigned to him, he shall, in any such case, be deemed guilty of a misdemeanor, and if convicted in any such case shall for such offence forfeit and pay not less than one thousand dollars.

Sec. 7. *And be it further enacted*, That any marshal of the United States may, for any purposes not inconsistent with the duties of the assistants herein provided for, appoint a deputy or deputies, to act in his behalf, but for all official acts of such deputy or deputies the marshal shall be responsible: *Provided, however*, An appointment to collect the social statistics shall not be deemed an interference with the duties of assistants.

Sec. 8. *And be it further enacted*, That whenever the population returned in any district shall exceed one million, the marshal thereof shall be entitled to receive as a compensation for all his services in executing this act, after the rate of one dollar for each thousand persons; but if the number returned shall be less than a million in any district, the marshal thereof shall be allowed for his services at the rate of one dollar and twenty-five cents for each thousand persons: *Provided, however*, that no marshal shall receive less than two hundred and fifty dollars; and when the compensation does not in the whole exceed the sum of five hundred dollars, a reasonable allowance for clerk hire shall be made, the amount whereof shall be determined by the Secretary of the Interior: *And provided, further*, That the marshal of any district may at his discretion perform the duties of an assistant in any subdivision in which he may reside, and when he shall personally perform the duties assigned by this act to assistants, he shall receive therefor the compensation allowed to assistants for like services.

II.—OF ASSISTANTS, THEIR DUTIES, LIABILITIES, AND COMPENSATION.

Sec. 9. *And be it further enacted*, That no assistant shall be deemed qualified to enter upon his duties until he has received from the marshal, under his hand, such a commission as is provided for in this act; and shall take and subscribe the following oath or affirmation, which shall be thereon endorsed to wit:

I, , an assistant to the marshal of , do solemnly swear (or affirm) that I will make a true and exact enumeration of all the inhabitants within the district assigned to me, and will also faithfully collect the other statistics therein, in the manner provided for in the act for taking the seventh census, and according to all lawful instructions which I may receive, and will make due and correct returns thereof as required in said act.

(Signed.) which said oath or affirmation may be administered by any judge of a court of record, or any justice of the peace empowered to administer oaths, and a copy thereof duly authenticated shall be forwarded to the marshal by such assistant, before he proceeds to the business of the appointment.

Sec. 10. *And be it further enacted*, That each assistant, when duly qualified in manner aforesaid, shall perform the service required of him by a personal visit to each dwelling house, and to each family, in the subdivision assigned to him, and shall ascertain, by inquiries made of some member of each family, if any one can be found capable of giving the information, but if not, then of the agent of such family, the name of each member thereof, the age and place of birth of each, and all the other particulars specified in this act, the tables thereto subjoined, and the instructions to the Secretary of the Interior and shall also visit personally the farms, mills, shops, mines, and other places respecting which information is required as above specified, in his district, and shall obtain all such information from the best and most authentic sources, and when it cannot be obtained, the reasons why it cannot be obtained, and when it cannot be obtained, the reasons why it cannot be obtained, and when it cannot be obtained, the reasons why it cannot be obtained

SCHEDULES TO CENSUS BILL.

SCHEDULE 1.—Free Inhabitants in ... enumerated by me, on the ... day of ... in the County of ... 1850. ... State of ... Assistant.

Dwelling-houses numbered in the order of visitation.	Families, numbered in the order of visitation.	DESCRIPTION. Name of every person whose usual place of abode on the first day of June, 1850, was in this family.	Age.	Sex.	Color, white, black, or mulatto.	Profession, occupation, or trade of each male person over 15 years of age.	Value of real estate owned.	Place of birth, naming the State, Territory or country.	Married within the year.	Attended school within the year.	Persons over 20 years of age who cannot read and write.	Whether deaf and dumb, blind, insane, idiotic, pauper, or convict.

Approved, May 23, 1850.

MARRIED,

In Providence, on the 12th inst. by the Rev. Mr. Caswell, Mr. Benjamin A. Hall to Miss Mary Ann Weaver, all of Providence.

In this city, on the 12th inst. by the Rev. Henry Barnes, Mr. Joseph S. Brown of Tiverton to Miss Mary Ann S. Riley, of this city.

DIED,

In this city, on the 13th inst. Mrs. Mary Ann Sherman, aged 58 years.

In this city, on the 13th inst. Abby Sherman, wife of Mr. Richard

CAUTION.

THE REMARKABLE CURATIVE POWERS OF

DR. S. P. TOWNSEND'S

COMPOUND EXTRACT OF

SARSAPARILLA,

Have induced numerous attempts by counterfeiters to imitate it, and make Counterfeits of Dr. Townsend's name, to secure the sale of spurious articles.

The countless thousand imitations only prove the value of the ORIGINAL; as the most extensive advertisement could be paid to Dr. S. P. Townsend's Extract of Sarsaparilla than the numerous efforts that have been made by many to set up something like it. As to the numerous attempts that have been made to counterfeit Dr. Townsend's name, as to create confusion in the public mind in reference to the GENUINE ARTICLE, we publish below A CARD OF ALL THE

Principal Wholesale Druggists

IN NEW YORK.

We, the Undersigned,

WHOLESALE DRUGGISTS

IN THE

CITY OF NEW YORK,

Have sold Dr. S. P. Townsend's Extract of Sarsaparilla for several years, and consider it the ORIGINAL and GENUINE Dr. Townsend's Sarsaparilla, and that it was the first introduced to public notoriety under that name.

TO THE PUBLIC.

The public are hereby notified that the genuine article of DR. S. P. TOWNSEND'S COMPOUND EXTRACT OF SARSAPARILLA is now manufactured under my direction and supervision from the original recipe obtained from Dr. S. P. Townsend, as I certify that it is entirely vegetable, and WITHOUT MERCURY, and also that it is free from all deleterious or impure articles, so as to obtain from them their concentrated medicinal virtues.

JAMES R. CHILTON, M.D.,
Chemist.

Dr. Chilton's name is surely that the elements of this Extract are combined in the most correct and scientific manner, and that it is adapted to the wants of the invalid, with the highest professional ability.

THIS WE HOPE WILL BE SUFFICIENT GUARANTEE to the public, and to those purchasing Dr. S. P. Townsend's Compound Extract of Sarsaparilla. Such may have no fear of getting one of the spurious and BANEFUL MIXTURES which fill the channels of trade, and are concocted without any knowledge either of the nature of vegetable agents, or the wonderful Healing Powers which lie in the Vegetable Kingdom.

☞ S. P. TOWNSEND'S SARSAPARILLA IS WARRANTED TO

Keep for any Length of Time,

IN ALL CLIMATES.

CAUTION.

We would remark that it will be necessary to see that

Dr. James R. Chilton's Certificate

as well as the SIGNATURE of Dr. S. P. Townsend, is on the outside wrapper of each bottle.

Sold by all the *Principal Druggists* and *Country Merchants* throughout the United States, Canada, &c. &c.
